Balance: \$1,000,000

- **Win** – Display current round total win

Win: \$1,000,000

- **Clock** – Display time of current player session

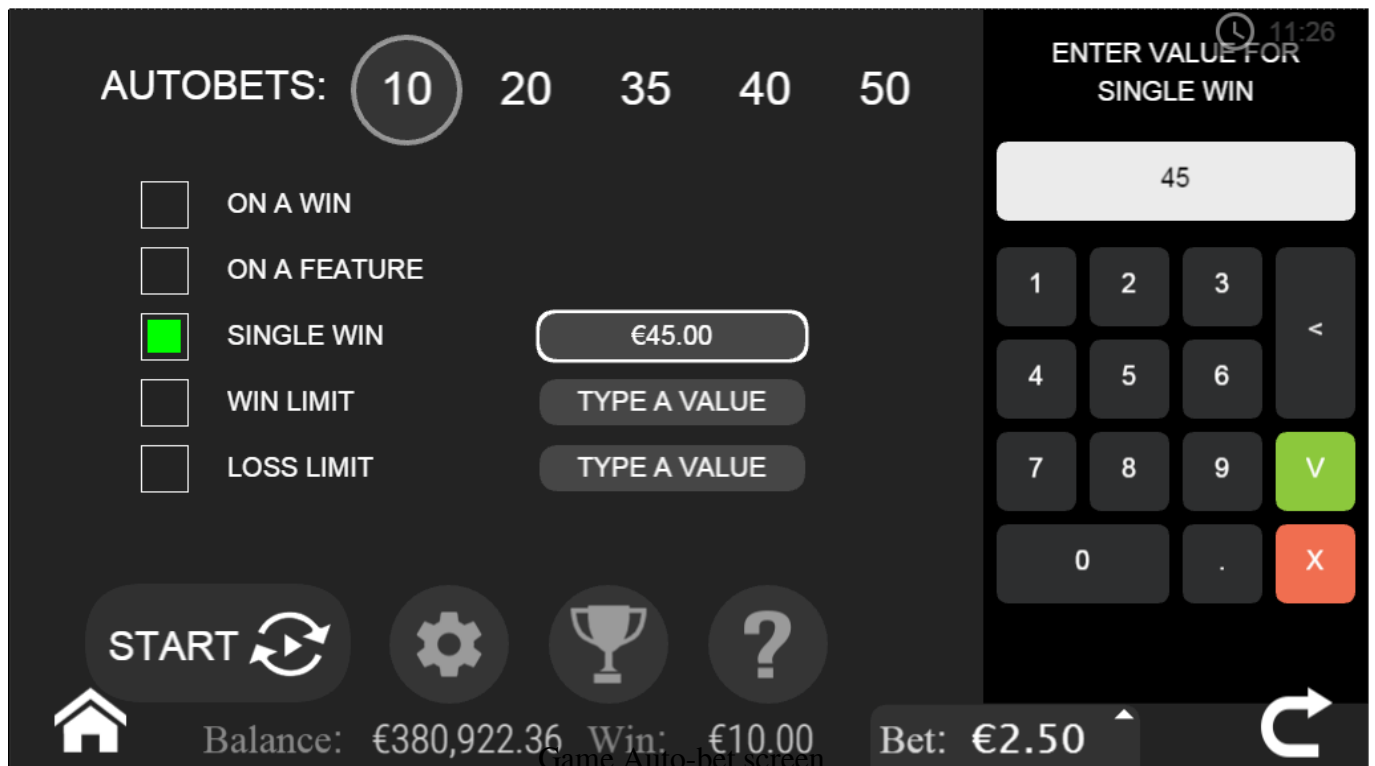

🕒 00:24

All game settings and info pages such as help and pay table are accessed by pressing the settings icon.

Setting Auto-Bet - Mobile

The player needs to press the auto-bet floating icon, right above the spin icon, in order to enter the auto-bet settings page.

Auto-bet settings can also be reached through the game settings (Settings=>Auto-bet)

Game Auto-bet screen

Generic Auto-bet scheme

Auto-Bets Limits:

- **Loss limit (numeric value)** - Pauses the auto bet function (see below) when the total loss of the user so far ($\text{SUM}(\text{bet}) - \text{SUM}(\text{win})$) $\geq$ (numeric value)

- **Single Win (numeric value)** - Pauses the auto bet function (see below) when a single win payout $\geq$ (numeric value) or more.
- **Win Limit (numeric value)** - Pauses the auto bet function (see below) when the total Win of the user so far ($\text{SUM}(\text{bet}) - \text{SUM}(\text{win})$) $\leq$ (numeric value)
- **Stop on win** - When any single round results with a win of any size, auto-bet deactivates. Free spins count as one round, so if a main ticket didn't win any line but did win free spins, and one of the free spins wins any amount, the round counts as a win.
- **Stop on a feature** - When free spins is won or a bonus game, auto bet deactivates.
- Each limit can be turned on or off by pressing on the onoff button next to it.
- To set the number of auto-bets rounds, the player picks the desired value from the top list of optional values by pressing on the desired value. The selection mark is set on the last settings.
- When a limit is reached and the Auto-bet stops, a message pops in the center of the screen reading according to the limit:
 - "Loss limit reached"
 - "Win limit reached"
 - "Single win reached"
 - "Win reached"
 - "Feature reached"

Message will fade out after 5 sec or on any tapping (screen or button pressed)

To exit the auto bet panel, the player can:

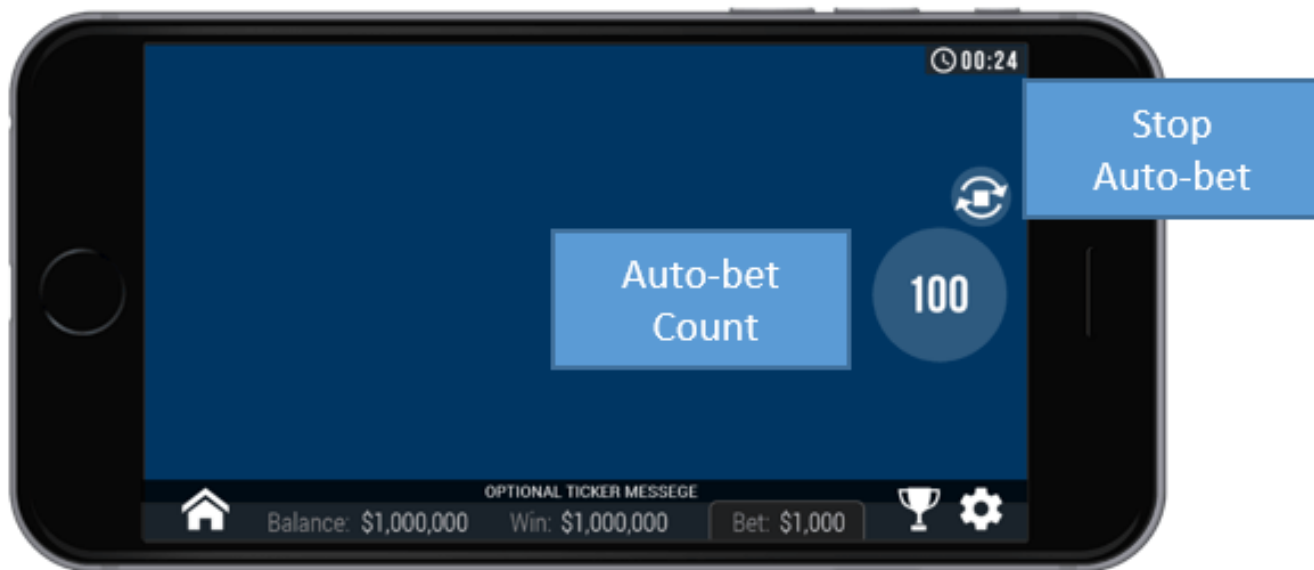

- Start the auto-bet rounds by pressing "**START**".
- Exit auto-bet completely by pressing the "**return to game**" button on the right.

Auto-Bet Active View:

When the auto-bet is activated, the player is returned to the game view.

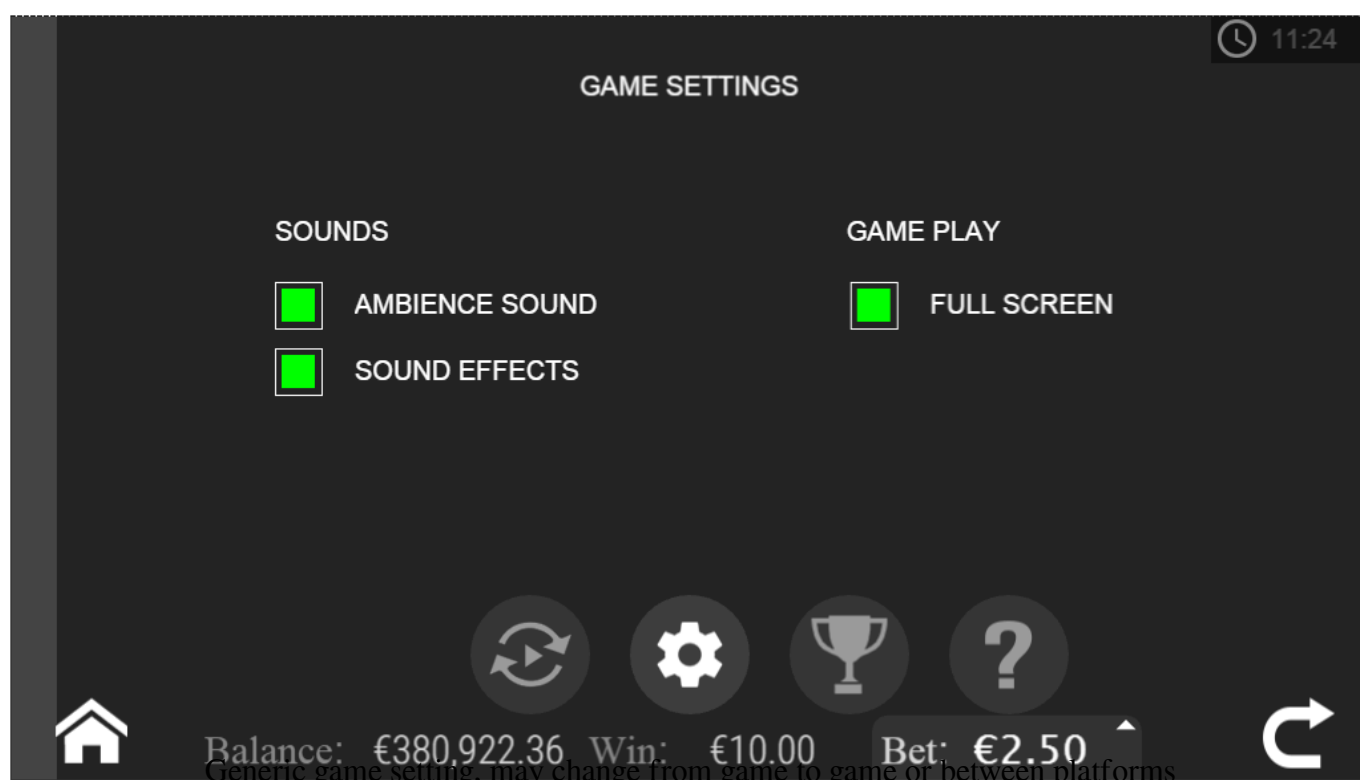

The spin button is replaced by a counter displaying the remaining auto-bet rounds. The auto-bet button is changed into "**Stop auto-bet**" icon.

Clicking on the "**Stop auto-bet**" or on the counter, stops the auto bet and returns to regular game mode.

Game Settings Page

- Setting sound – Ambiance Sound – enabling or disabling background music.
- Setting sound –Sound effects – enabling or disabling sound effect.
- Full Screen – enabling or disabling Full screen mode- this option is not available on iOS.

Generic game setting, may change from game to game or between platforms
